# Who we are

**FROMM** Packaging Ltd. was established in the UK in 2004 now based in Taplow, Buckinghamshire. We are predominantly a Sales, Marketing and Distribution company who supply the complete range of FROMM equipment throughout the UK.

The **FROMM** Group develops and produces a wide variety of systems for unitising and palletising goods for transport: Strapping Machines and Systems, Pallet Stretch Wrapping Machines, the patented Airpad Pillow System, together with all necessary consumables.

Established in 1947, the Swiss family company employs a workforce of over 1000 people worldwide. Over 40 subsidiaries in Europe, North and South America, South Africa, Asia and Australia along with a multitude of specialised sales partners throughout the world ensure – in your vicinity – professional advice, prompt customer service and maintenance.

Our equipment has an excellent reputation for quality and reliability throughout all market places in the world. Here in the UK our number one goal is to provide a high quality service to our customers which will match and hopefully better the reputation of the quality of our equipment.

# Environment & Sustainability

**FROMM** 's objective is to structure and plan all environmental and Eco political actives trying to avoid direct and indirect pollution of the environment .

As producer of plastic products we apply great importance to continuous improvement of material- and energy use. This is achieved by using state-of-the-art process engineering

Our Sustainability Policy shows how we are doing our part in making sustainability a core mission within our organisation

- ✓ **FROMM** encourages the Customers to participate in Waste Management Program to improve environmental objectives to 'go green'
- ✓ **FROMM** is committed to preserving and protecting the area's ecosystems and natural resources
- ✓ **STARstrap**™ plastic strappings are produced in the **FROMM** production centres exclusively from recycled polyester bottle material on modern state-of-the-art extrusion plant.
- ✓ To Fulfil the new EU-regulation the most plastic material has to go back to the closed-loop Recycling

♻️ Recycle your **FROMM** strap today... for a greener tomorrow

# Closed Loop Recycling

Closed Loop Recycling is to help Customers to reduce their packaging waste and disposal cost and to fulfil their environmental safeguarding objectives “go green”.

*Important for FROMM: long-term aspects of sustainability*

Our PET (Polyester) Plastic Strapping is produced in **FROMM's** very own production centres, made exclusively from recycled polyester bottle material on modern state-of-the-art extrusion plants

Carbon footprint has to be reduced significantly and sustainability has to be ensured continuously

Recycle your **FROMM** strap today... for a greener tomorrow

  
FROMMs Recycle  
your Strap Program

# Getting started

“Sustainability” is a priority to **FROMM**

## □ Why Recycle

- ✓ Plastics are not biodegradable and due to the conditions in landfill, they are likely to persist there indefinitely. The use of recycled material saved about 85% of CO2 emissions compared with primary processes. Disposing of manufacturing scrap waste costs small and large organisations thousands of pounds each year.
- ✓ Reducing Strap waste through recycling not only saves money, but also improves a company’s efforts to “go green.”

## □ Can I recycle any strap?

- ✓ PET strap has to be clean; without oil, glue or glued labels on the surface
- ✓ **FROMM** will only accept chopped PET (Polyester) strap. Chopped PET strap can be any colour but must not be contaminated by any other waste or contaminant or other types of plastic strap i.e. Polypropylene strap (PP) or any woven fibre straps are not accepted in this program

# Preserving and Protecting

**Sustainability**, the capability to equitably meet the vital human needs of the present without compromising the ability of future generations to meet their own needs by preserving and protecting the area's ecosystems and natural resources.

## ❑ Reduce

- ✓ **FROMM** constantly analyses methods to reduce our industrial packaging materials as well as to identify opportunities to reuse and recycle these materials

## ❑ Reuse

- ✓ **FROMM** have introduced Waste Management programs to limit waste by collecting our Customers' used PET strapping for reuse in the production of new Strapping

## ❑ Recycle

- ✓ **FROMM** /TEXPLAST operates PET recycling facility providing raw materials to all of our manufacturing locations
- ✓ Our PET (Polyester) Plastic Strapping is produced in **FROMM's** very own production centre's, made exclusively from recycled polyester bottle material on modern state-of-the-art extrusion plants

# Waste Management Program

Reducing Strap waste through recycling not only saves money, but also improves a company's efforts to "go green."

## ☐ Reduce your Packaging waste in 5 easy steps

1. Collect used Polyester (PET) strap - must not be contaminated by any other waste
2. Chop used strap and store in a bulk bag
3. Deliver to **FROMM's** Distribution Centre or arrange for collection (min. weight applicable\*)
4. After inspection of material; **FROMM** will recycle customers clean chopped PET strap

✓ Enquire today to purchase a **FROMM** Strap Chopper
